The Marianas Grazing and Livestock Management Academy is an educational opportunity provided by the University of Hawaii and the University of the Virgin Islands in cooperation with the Northern Marianas College and the University of Guam. It is designed to help livestock producers and land managers of all levels of experience become better equipped to manage the animals and resources under their care. The program will provide classroom instruction and field experience in sustainable grazing and livestock management practices. Participants will learn about:

- + Soils and Soil Management
- + Basic Principles in Forage Production
- + Principles of Grazing Management
- + Grazing Systems and Strategies
- + Weed Control Techniques
- + Basic Animal Health and welfare
- + Factors that affect Beef Quality and Grass Finish Beef Programs
- + Beef Cattle Genetics and Principles of Animal Science
- + And More!

This project is supported by the Outreach and Assistance for Socially Disadvantaged Farmers and Ranchers program of the USDA National Institute of Food and Agriculture, grant #2009-51200-19601
