Course Alpha and Number: FM 300

Course Title: Introduction to Financial Management

Reason for initiating, revising, or canceling:
Finance is one of the key drivers of a firm’s activities, and a critical component to understanding business in general. Introduction to Financial Management is designed to help students with no prior knowledge grasp the applications and relevance of finance. Students are required to make sound economic decisions on a daily basis, but to make the best decision they need to first have the appropriate financial facts. This course is required for students enrolled in the Bachelors of Science in Business Management. Student’s engagement in financial management real-world applications and issues are a critical portion of the course.

  11.5 Relevance for Managers

12.0 Designing an Optimal Capital Structure
  12.1 Factor Affecting Financing Decisions: The FIRST Approach
  12.2 Tradeoff Assessment: Evaluating FIRST Criteria
  12.3 Relevance for Managers

13.0 Measuring and Creating Value
  13.1 An Overview of Measuring and Creating Value
8. **Instructional Goals**
This course will enable students to:

1.0 Develop an understanding of the tools that are used to value investment projects and companies (valuation);

2.0 Understand the basic issues involved in how firms should raise funds for their real investments (financing); and

3.0 Evaluate how investment and financing decisions are related.

9. **Student Learning Outcomes**
Upon successful completing of this course, students will be able to:

1.0 Discuss the ethical challenges facing Financial Managers;

2.0 Calculate a comprehensive set of financial ratios and use them to evaluate the financial health of a company;

3.0 Determine the future or present value of a sum when there are non-annual compounding periods;

4.0 Calculate the annual percentage yield or effective annual yield;

5.0 Explain the differences between the effective annual yield and the nominal or stated interest rate;

6.0 Calculate the market risk of an individual asset and a portfolio of investments;

7.0 Compute a bondholder's and a stockholder's expected rate of return;

8.0 Value preferred and common stock;

9.0 Calculate a corporation's weighted cost of capital;
10.0 Use the basic tools of capital structure management;

11.0 Distinguish between the types of dividend policy corporations frequently used;

12.0 Assess the advantages and disadvantages of using current liabilities to finance a firm's working capital requirements;

13.0 Analyze the different mechanisms for managing the firm's cash collection and disbursement procedures; and

14.0 Calculate the net advantage of leasing versus purchasing an asset.

10. Assessment Measures
Assessment of student learning may include, but not be limited to, the following:

1.0 Tests and Exams;

2.0 Peered Reviewed Case Study;

3.0 Homework;

4.0 Stock Market Assessment;

5.0 Research Assignments;

6.0 Class Participation; and

7.0 Oral Presentations.
